COURSE *Walkthrough*

Nicklaus Design emphasises the interplay between passive and active factors within their course design, making the course more dynamic, and compelling players to interact with their immediate environment far more intimately.

The 9-Hole, Par-36, Phase I of The Imperial Golf Course pays close attention to the textures and

contours of the terrain. The thickness of grass on the roughs is maintained at 40 mm, the bunkers contain fine white sand from Orissa, and the greens undulate in unexpected ways, tweaking the golfer's engagement with the game from overall strategy to the tiniest of details.
